Evergreen Membership FAQ's

How does the Evergreen deposit based club membership differ from traditional dues based membership?
In lieu of annual dues, an Evergreen deposit member is extended club member privileges with an initial member account deposit. The pre-paid member account is then used toward member activities/purchases at the clubs, including golf.

Why would a golfer select deposit based club membership opposed to an annual dues paying membership?
Many golfers want a club member experience but can't get out to play the number of annual rounds needed to justify fixed rate dues. Deposit membership provides the experience, and all member privileges as does dues based club membership, but allows the member to pay only for rounds actually played.
